

Printhead Compatibility Guide – JD DTF Ink

1. Introduction

JD DTF Ink is developed with advanced dispersion technology to ensure stable printing performance across a wide range of piezoelectric printheads. This guide provides compatibility details, recommended settings, and best practices for achieving optimal results with JD DTF Ink.

2. Compatible Printheads

Brand	Printhead Models	Notes
Epson	XP600,	Most common heads for desktop DTF printers
Epson	i3200, 4720, DX5,	Used in industrial-level DTF printers

3. Recommended Ink Usage

- Print order: CMYK first, then high-opacity White underbase
- Compatible with JD DTF PET Film and TPU powder
- Use ICC profiles provided by JD for accurate colors
- Maintain humidity at 40–60% and temperature at 20–28°C for best results

4. Key Benefits

- Smooth ink flow, prevents nozzle clogging
- Stable viscosity for continuous long runs
- Sharp image reproduction on different printheads
- Reduced downtime and maintenance cost
- Proven durability and wash fastness

5. Technical Support

JD provides tailored ICC color profiles, printer calibration guidelines, and technical consultation to ensure seamless integration of DTF ink with your chosen printheads.
